- 🏠 Bengaluru, India.

EDUCATION

Post Graduate Diploma in Embedded System Design
CDAC 2021

Bachelor of Engineering in Electronics & Telecommunication
North Maharashtra, University
2021
CGPA- 7.8

SKILLS

- Embedded C
- BSP
- Board Bring-up
- HAL, BareMetal, Debugging
- DO-170 & Do-178
- Linux Device Driver, Linux System programming, Linux Kernel Customization
- Linux Porting
- PCIe communication
- Project Planning

ACHIEVEMENTS

- **Aero Bronze Award 2x**
- **Aero Top Flyer**

PROFESSIONAL OVERVIEW

Passionate Embedded Engineer with 3.4y of experience in the aerospace industry. Skilled in Linux kernel customization, compilation, kernel porting, Linux porting, RTOS and Bare-metal Development.

WORK EXPERIENCE

Embedded Engineer I

Skyforce Observer Obsolescence project | 2022 – 2023

- Migration of Linux kernel from v1.4.16 to v4.14.200.
- Customization of new kernel, Board Bring-up and porting old Device drivers to newer kernel.
- Project Timelines and Delivery Planning for IMS tracking.
- Saved ~250H of efforts by reducing kernel compilation time.
- Linux Platform delivered to Application team ahead of projected timeline.
- Productivity savings by Automating the process of production Linux image.
- Successful completion of 2 Design Sprints with solution for 2 major critical issues.

Embedded Engineer II

HBIT TXD for Airbus | 2023 – 2024

- Migration from old Thunderbolt build to latest version.
- Restructure HBIT development process for faster delivery.
- Migration of all Test cases as per latest Thunderbolt APIs.
- Project Timelines and Delivery Planning.
- Delivered and released 2 successfully build before actual delivery date in Bitbucket.

Embedded Engineer II

Image Processing Module for BEL | 2023 – present

- Hosting Red Hat Real Time Linux on Tigerlake processor.
- PCIe communication between Tigerlake to Nvidia Jetson Orin, Orin to FPGA Video board module, Tigerlake to IO FPGA.
- PBIT - CBIT - IBIT tests, MIL1553 Driver Development.
