EXECUTIVE SUMMARY

Strategic Quality Lead | Aerospace QMS AS9100D & Operational Excellence Professional with 9+ years of experience leading Quality Management Systems, Supplier Quality, Audit Governance, Special Process Compliance, and Continuous Improvement initiatives across aerospace, precision engineering, and advanced manufacturing environments. Proven expertise in AS9100D implementation, supplier quality governance, NCR/MRB management, quality escape prevention, FAI (AS9102), Product & Process Validation, and NADCAP compliance support. Experienced in leading cross-functional teams and delivering quality assurance support for global aerospace programs for Airbus, Boeing, Thales, HAL, and BEL. Recognized for strengthening compliance, improving supplier performance, reducing quality escapes and COPQ, and delivering sustainable operational excellence.

CAREER ACHIEVEMENTS

- ▶ Spearheaded implementation and deployment of the AS9100D Quality Management System (QMS), ensuring certification readiness, regulatory compliance, Product Safety, Counterfeit Parts Prevention, Configuration Management, and Product Traceability controls and continual improvement across aerospace manufacturing operations.
- ▶ Directed Incoming, In-Process, Final Inspection, FAI (AS9102), Product & Process Validation activities to ensure product conformity, traceability, and customer satisfaction.
- ▶ Administered Non-Conformance (NC) control, RCCA, CAPA, supplier quality issues, and audit findings, driving sustainable corrective actions and risk reduction.
- ▶ Established and strengthened Internal Audit, Supplier Audit, Quality Compliance, and Supplier Quality Management programs, enhancing QMS effectiveness and organizational readiness.
- ▶ Drove Continuous Improvement, Kaizen, PDCA, and cross-functional quality initiatives that reduced defects, rework, COPQ, and enhanced operational excellence.

AREAS OF EXPERTISE

◆ Quality Management Systems (QMS) ISO 9001 / AS9100D	◆ Change Management Systems
◆ Internal, External & Supplier Audits	◆ Non-Conformance Management (RCCA & CAPA)
◆ APQP, PPAP, FMEA, MSA & SPC	◆ First Article Inspection (FAI/AS9102)
◆ Process, Product Validation & continuous Improvement	◆ Calibration & Measurement Systems
◆ Customer Quality Management	◆ Risk Assessment & Compliance
◆ Supplier Quality Management	◆ Configuration Management

PROFESSIONAL EXPERIENCE

Expleo Group · Bengaluru

Quality lead – (Aerospace/Manufacturing) | April 2026 – June 2026

Strategic Role: Leading aerospace quality strategy and OEM program quality governance for multi-client Airbus and Boeing programs within Expleo's Engineering Services practice.

- ▶ Define and govern aerospace quality strategy across multiple OEM programs; establish quality gates, inspection frameworks, and audit cadence aligned to AS9100D and customer-specific requirements.
- ▶ Conduct AS9100D and NADCAP supplier audits at Tier 1 & Tier 2 suppliers; assess QMS maturity, develop improvement roadmaps, and track corrective action effectiveness through structured CAPA governance.
- ▶ Serve as primary quality interface to Airbus and Boeing program teams; oversee customer escapes, NCR dispositions, MRB activities, and concession requests with full accountability for closure timelines.

- ▶ Author and review Quality Planning deliverables — ITPs, Control Plans, AS9102 FAI packages — for new product introductions, engineering changes, and program transitions.
- ▶ Drive cross-functional quality transformation initiatives; facilitate lessons-learned reviews, risk assessments, and supplier development programs to continuously raise the supply chain quality bar.
- ▶ Mentor and guide junior quality engineers; provide technical direction on RCA methodologies (8D, Ishikawa, 5-Why) and quality tool application across the team.
- ▶ Facilitate continuous improvement initiatives and lessons-learned sessions to strengthen the supply-chain performance foundation and reduce repeat non-conformances across aerospace supply chain programs.
- ▶ Collaborated with cross-functional teams across Production, Engineering, Procurement, and Operations to enhance product quality, resulting in a 25% reduction in internal defects and 20% improvement in customer compliance performance.
- ▶ Maintained adherence to AS9100D requirements related to Product Safety, Counterfeit Parts Prevention, Configuration Management, Traceability, and Supplier Quality Assurance across aerospace manufacturing operations
- ▶ Oversaw MRB, NCR, and Quality Escape processes, strengthening product conformity, customer satisfaction, and AS9100D compliance across aerospace manufacturing operations.

Transline Ltd. • Bengaluru

Senior QMS Engineer – Aerospace QA/QC | July 2025 – Jan 2026

Strategic Role: Owned the AS9100D QMS transformation programme end-to-end — from gap analysis and system design through implementation, internal audit, and surveillance readiness.

- ▶ Directed AS9100D QMS implementation across all manufacturing functions; conducted gap assessments, designed the quality system architecture, and authored the complete procedure and work-instruction library.
- ▶ Established an internal audit programme against AS9100D and ISO 9001; built audit schedules, trained cross-functional audit teams, and coordinated finding closure to achieve surveillance readiness.
- ▶ Designed and deployed a supplier quality governance framework — qualification criteria, audit protocols, NCR workflows, and RCCA/CAPA tracking — reducing incoming defect rates significantly.
- ▶ Implemented shop-floor process and product audit programmes; embedded control-plan adherence checks and FOD prevention protocols across critical assembly stations.
- ▶ Drove Kaizen and PDCA improvement cycles with production and engineering leadership, delivering measurable reduction in scrap, rework, and Cost of Poor Quality.
- ▶ Established quality metrics, KPI dashboards, and management review reporting mechanisms to support data-driven decision-making and continual improvement.
- ▶ Ensured readiness for customer audits, certification audits, and surveillance assessments through effective QMS governance and compliance monitoring.
- ▶ Managed and implemented **150+ ECN/ECR changes annually**, ensuring 100% configuration compliance and reducing process-related nonconformities by **15%**.

Southern Electronics Bangalore Pvt. Ltd. • Bengaluru

Senior Engineer – Quality Assurance (Aerospace & defense) | Oct 2022 – May 2025

Strategic Role: Managed quality assurance operations and QMS compliance for a high-mix aerospace and electronics manufacturing environment supplying Airbus, Boeing, Thales, HAL, BEL, and L&T.

- ▶ Owned end-to-end quality operations — Incoming, In-Process, and Final Inspection — maintaining AS9100D and ISO 14001:2015 compliance across all quality records and customer deliverables.
- ▶ Directed quality planning activities through development and deployment of ITPs, Control Plans, QAPs, and inspection strategies for aerospace and manufacturing programs.
- ▶ Managed In-Process Validation and Production Validation programs, ensuring manufacturing readiness, process stability, product quality, and compliance with AS9100D requirements.
- ▶ Defined CTQ/CTP parameters, authored Quality Assurance Plans, and led all FAI activities (AS9102) for NPDP components; ensured zero non-conforming deliveries on critical aerospace programs.
- ▶ Led cross-functional RCCA and CAPA teams on supplier and customer non-conformances; imposed COPQ recovery on underperforming suppliers in coordination with procurement and finance.
- ▶ Sustained a 95%+ quality KPI index through rigorous SOP, Control Plan, and PFMEA governance; facilitated daily management reviews and PDCA improvement cycles with production leadership.

- ▶ Reduced customer complaints by **20%** through RCCA, CAPA, and enhanced quality control measures.
- ▶ Led Engineering Change Control and FOD prevention initiatives across critical manufacturing programs, achieving zero customer quality escapes and maintaining 100% compliance during internal and customer audits.
- ▶ Facilitated supplier process validation and verification activities for aerospace components and special processes
- ▶ Conducted internal AS9100D audits and special process audits; monitored calibration compliance and verified NABL certification for all measuring instruments.
- ▶ Knowledge of PPAP documents (Process Flow, Control Plan, Statistical Process Control (SPC), Process capability study (Cp, Cpk).
- ▶ Deployed 7 QC Tools, Poka-Yoke, and 5S methodologies on production lines, reducing rejection rates and establishing standardized, repeatable workflow processes.
- ▶ Hands-on experience in manufacturing process like machining, Fabrication, Molding, Powder coating, painting. & implementing SOPs within the process to ensure consistent workflow
- ▶ Coordinated with production teams to reduce in-process rejection through Foreign Object Damage (FOD) prevention and quality control initiatives.
- ▶ Reduced incoming inspection rejection rate by **30%** through supplier quality improvement and process validation initiatives.

Active CNC Engineering. • Bengaluru

Quality Engineer | Oct 2020 – Oct 2022

- ▶ Directed Quality Assurance, Quality Management System (QMS), Supplier Quality, and Operational Excellence activities to ensure compliance with organizational and customer requirements.
- ▶ Drive ISO 9001 QMS implementation, audit readiness, compliance monitoring, and continual improvement initiatives across manufacturing operations.
- ▶ Manage Non-Conformance Reports (NCR), Material Review Board (MRB), Quality Escapes, Root Cause Corrective Action (RCCA), and Corrective & Preventive Action (CAPA) processes.
- ▶ Conduct and support Internal, External, Customer, and Supplier Audit programs, ensuring timely closure of findings and sustained compliance.

Suchirin Auto Parts India Pvt. Ltd. • Bengaluru

Quality Engineer | May 2019 – May 2020

- ▶ Led APQP and PPAP activities for new automotive program launches; authored complete documentation packages (Process Flow, Control Plan, PFMEA, Cp/Cpk) meeting IATF 16949 requirements.
- ▶ Managed supplier quality governance — qualification audits, NCR issuance, RCCA/CAPA tracking — improving supplier quality KPIs and reducing incoming defect rates.
- ▶ Applied SPC and 7 QC Tools to analyze defect trends and drive targeted corrective actions, achieving measurable in-process rejection reduction.
- ▶ Performed In-Process and Final Inspections on **500+ components per month**, achieving **98% First Pass Yield** and reducing customer complaints by **20%**.

Maini Precision Products Pvt. Ltd. • Bengaluru

Aerospace Quality Engineer | June 2018 – April 2019

- ▶ Performed First Article Inspection (FAI) per AS9102 on precision-machined aerospace components; validated dimensions, surface finish, and material certs using, profile projectors, and precision gauges.
- ▶ Contributed to AS9100D internal audits and NADCAP special process compliance; managed NCR lifecycle through 8D/5-Why RCA and CAPA to prevent recurrence of quality escapes.
- ▶ Coordinated with suppliers on incoming material quality issues; verified Certificates of Conformance, Material Test Reports, and third-party inspection reports for compliance.
- ▶ Assisted with internal QMS audits and documentation activities in accordance with AS9100D requirements; maintained inspection records, calibration logs, and non-conformance registers.

Wipro Infrastructure Engineering Pvt. Ltd. · Bengaluru

Quality Inspector – Aerospace products | June 2017 – May 2018

- ▶ Performed Incoming and In-Process inspections as per approved drawings; maintained calibration logs and NABL verification records with full instrument traceability.
- ▶ Experienced in Incoming Inspection activities for supplier-provided materials and components, ensuring 100% compliance with engineering specifications and strengthening supplier quality performance through effective nonconformance management and RCCA implementation.

TECHNICAL SKILLS

QMS & Standards: AS9100D, ISO 9001:2015, ISO 14001:2015, OHSAS 45001, AS9102

Quality Tools: APQP, PPAP, PFMEA, DFMEA, Change management, Configuration management, Control Plans, SPC (Cp/Cpk), MSA/R&R, 7 QC Tools, COPQ

Inspection & Metrology: FAI(AS9102), Layout inspection, GD&T & Calipers, Profile Projector, Surface Tester, Bore Gauge, Micrometer, VMS etc.

Problem Solving: 8D, 5-Why, Ishikawa, RCCA, CAPA, Kaizen, Poka-Yoke, PDCA, 5S, Risk Assessment

Auditing: AS9100D Internal Audits, NADCAP, Supplier Qualification Audits, Process & Product Audits

Leadership: Cross-functional Team Leadership, Stakeholder Management, Mentoring, Quality Governance, NC management, Product safety.

CAD / ERP: Solid Edge, SolidWorks, AutoCAD, Tally ERP, SAP

IT Tools: MS Excel (Advanced), Word, PowerPoint, Outlook

EDUCATION

B.E. – Mechanical Engineering | IBVE, Bengaluru | 2020 | CGPA: 7.9 / 10

Diploma – Mechanical Engineering | Ashoka Polytechnic, Bengaluru | 2017 | 74%

CERTIFICATIONS & RECOGNITION

- ▶ Certified Internal Auditor – AS9100D & ISO 9001:2015
- ▶ Kaizen Excellence Award – Poka-Yoke Implementation on Productivity Line | Wipro Infrastructure Engineering
- ▶ Certified – Mechanical Measurement & Inspection Techniques | APEX Hi-Tech Institute
